Hi Colleen,

See below. Are you aware of the changes that he's talking about? Do you know if or when ADEQ is planning to incorporate them into the state SIP? This is related to Hickman Egg Farm.

Maeve Clancy

Maeve,

Here in Arizona the Agricultural Best Management Committee made some rule changes. See below. The way the statutes/regulations are written there is no public notice or opportunity for the public to provide input and they immediately become effective. I believe the revisions to the regulations lack scientific research for BMPs; allow point sources to be regulated as non-point sources; bypass the new source review process; do not provide any limitations or oversight for trial testing, and there's more comments that I can make. I did not have the opportunity to make these comments and have them addressed in Arizona, but I'm hoping to have the opportunity when they are submitted to be included in the SIP. How can I find out when they are submitted

to the EPA or how can I be notified?

Dan
